

Paseo Master Association
Presidents Report
November 2020

We were informed of a positive Covid-19 test for one of our employees. We take the safety and health of our workers and members as our highest priority. This employee will be off work for a quarantine period and will be required to supply a negative test to return to work. Also, employees with close contact will be asked to produce a negative test to return to work and hopefully our employee mask wearing policy minimized the spread. Again the master board urges members to continue to follow safety recommendations such as social distancing and face masks.

For a variety of reasons the service labor market will be extremely tight this season. I think we will discuss this under the manager's report agenda item. We ask members and guests to be patient with our staff as the next 5 months without a full staff will be challenging for them. We are doing everything we can to hire additional help.
